DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed January 31, 2006 have been acknowledged.
2. Examiner acknowledges cancelled claims 15-17.
3. The rejection of claim 1-2, 4, 7 and 9-17 under 35 U.S.C 101 as claiming the same invention as co-pending application 10/771,045 is withdrawn due to applicant's argument.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al., U.S. Patent Number 5,998,045.

Chen discloses an organic electroluminescent device comprising a light-emitting composition disposed between a first and second electrode (see column 1, lines 65-68). Additionally, the reference discloses a light emitting composition comprising a copolymer formed from fluorene and anthracene as per instant claim 1. The Chen reference also discloses that the fluorene monomer is optionally substituted with one or more substituents such as phenyl, benzyl, phenoxy, benzyloxy or lower (C₁₋₁₀) alkyl or alkoxy wherein the substituent is preferably at 9 position (see column 2, lines 8-23). Column 2 of the reference also discloses that the anthracene

Art Unit: 1774

monomeric unit can be optionally substituted with one or more substituents such as phenyl, benzyl, phenoxy, benzyloxy, or lower (C₁₋₁₀) alkyl or alkoxy. Additionally, column 2, lines 50-60 of the Chen reference discloses that the copolymer of fluorene and anthracene comprise 40-80 mol % of the fluorene monomer and about 5 to 20 mol % as per instant claims 5-6.

Response to Arguments

6. Applicant's arguments filed January 31, 2006 have been fully considered but they are not persuasive. Applicant argues that the Chen reference does not teach or suggest that there **should** be two different substituents. The Chen reference discloses that the fluorene monomer is optionally substituted with one or more substituents such as phenyl, benzyl, phenoxy, benzyloxy or lower (C₁₋₁₀) alkyl or alkoxy wherein the substituent is preferably at 9 position (see column 2, lines 8-23). Column 2 of the reference also discloses that the anthracene monomeric unit can be optionally substituted with one or more substituents such as phenyl, benzyl, phenoxy, benzyloxy, or lower (C₁₋₁₀) alkyl or alkoxy. Although the reference does not disclose that there should be two different substituents, the Chen reference allows for two different substituents on the fluorene and anthracene monomers. The rejection is maintained.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1774

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
